Biography - Nicholas Halecky, Data Science Director

Nicholaus (Nico) Halecky leads Data Science at Bombora, a team tasked with transforming Bombora's significant reserves of raw content interaction data to business intent signals.

Prior to Bombora, he led modeling and analytics at a building energy monitoring startup, along with brief stint in financial markets.

He received his Ph.D. in nuclear engineering from UC Berkeley in 2010, where he advanced computational models simulating heat and mass transport processes in radioactive waste disposal.

When not testing hypotheses about temporal-spatial transients in topic interests or committing functional representations of data pipelines in Python, he can be found around family, friends, bicycles and craft beer.

He resides with his wife, Julia, and their two sons Eugene and Florian, in Reno, Nevada.
